REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claims 1-8 are allowable over the prior art of record for at least the reason that the prior art fails to teach or suggest a wave-fan with a heat sink, comprising a wave-fan, a heat sinking means and a motor means for rotating the wave-fan relative to the heat sinking means, the heat sinking means having at least one active heat dissipating surface, the wave-fan having at least one active fluid moving surface which conforms generally to the at least one active heat dissipating surface of the heat sinking means, and the at least one active fluid moving surface of the wave- fan comprising a plurality of ridges and valleys having a roughly sinusoidal contour along the direction of rotation of the wave fan.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Goto (Japan Patent JP02001012A) and Yari et al (Japan Patent 02257996 A) each teach a wave-fan comprising at least one active fluid moving surface which conforms generally to the at least one active heat dissipating surface of the heat sinking means, and the at least one active fluid moving surface of the wave- fan comprising a plurality of ridges and valleys having a roughly sinusoidal contour along the direction of rotation of the wave fan. However, none of them teach such a fan with a heat sink (Goto teaches a kitchen ventilation fan, and

Yari et al teach a dehydration cloth dryer fan). Examiner does not see any reason to provide a combination of such a fan and a heat sink, as it is claimed in the instant application.
